Real Estate Masters Programme: MSt in Real Estate 2022-2024

The Real Estate Masters Programme is a part-time Master of Studies (MSt) course offered by the Department of Land Economy drawing on the multi-disciplinary strength of the Department and the University. It is aimed at experienced professionals and those identified as future leaders in the real estate industry, and combines academic rigour with significant industry input. The course aims to equip participants with a broader knowledge of all aspects of the real estate industry, insight into a range of long-term themes and strategic issues in the market as well as developing a range of research and other skills.

This is a two-year part-time masters course designed for those with several years of professional experience in real estate or associated business; who have attained a leadership role; are identified as a potential leader or are seeking to take up a leadership role. The format permits students to continue with their professional career whilst studying. The course will enhance students’ technical skills and develop a range of other skills to enable them to be agents of change in the real estate industry and beyond.

“This course is unique in the way that it brings challenge, enjoyment and diversity together. You’re part of a cohort of individuals from across the world being stretched academically beyond what you thought you were capable of. You’re learning from multiple spheres of influence; each other, academics and industry, and you are developing an invaluable network of individuals and knowledge that will stay with you throughout your career.”

Hannah, MSt student cohort 2017-19

The programme aims to ensure that students have a solid understanding of the end-to-end processes in real estate investment and finance, whilst promoting innovation in real estate through highlighting some of the trends influencing the industry and the opportunities that this will bring. The course breadth is reflected in the topics it addresses from looking at the high level drivers of capital flows in real estate and changes in the urban environment through to asset management of individual buildings and optimising their performance.
COURSE THEMES
The course has a number of themes running through it that reflect some of the key trends shaping the industry today:

- The interaction between the economy and real estate markets
- Globalisation and its influence on the market
- Risk management and mitigation
- The impact of technological change on real estate
- Sustainable buildings and cities

Essential areas such as leadership, innovation, strategy, negotiation, partnering and critical analysis are also explored throughout the programme. The course is constantly evolving in order to keep abreast of emerging themes and issues in the sector.

COURSE STRUCTURE
The MSt is a two year part-time Masters Degree course. The programme is of a modular design and delivered through a combination of attendance at five intensive residential blocks in Cambridge (2 x 2 weeks and 3 x 1 week), online seminars and discussions and course materials released through a Virtual Learning Environment (known as Moodle).

The course is taught through a combination of:

- Taught sessions by academics and practitioners
- Individual work including: working through course materials on the VLE, course reading, preparation of written work (primarily between the residential sessions)
- Group work including: working through case studies, dialogue, debate, presentations and site visits throughout the residential sessions
- Supervisions and support from the Land Economy faculty tutors and supervisors from within the Collegiate University.

The residential sessions are designed to enable students to learn from one another as well as from the academic faculty staff and external industry speakers.

ENTRY REQUIREMENTS
Applicants should normally have a relevant UK first or good upper second class honours degree or overseas equivalent. In addition, students joining the course will typically have at least three years of professional experience in a relevant industry: finance, investment, real estate, architecture, planning, law and other built environment related professions, and, in some cases, a professional qualification in the discipline.

Further details can be found in the “Requirements” section of the ICE webpage:
https://www.ice.cam.ac.uk/course/mst-real-estate

Those applicants who do not meet the standard entry criteria, but have alternative qualifications or experience and have the potential to bring valuable assets to the programme, will be evaluated on an individual basis and may be required to provide further materials in support of their application e.g. professional qualifications or similar.

ASSESSMENT
Students are required to complete six assignments during the first year of the course: 3 case studies and 3 essays, each of no more than 3000 words. The assignments are normally released following each of the residential blocks. In the second year students complete a 10-12000 word dissertation.
The Course tutors, supervisors and contributors are a mixture of academic staff in the department and from across the wider University, as well as specially selected experts from industry with the knowledge/experience to deliver stimulating talks on current issues, developments and leadership challenges in the industry.

**Academic/Departmental Faculty:**
